SECURITY

BACKUP SOS
If ransomware hits or systems fail

DO THESE IMMEDIATELY

1. Isolate affected systems from network immediately.
2. Pull the recovery runbook (printed + offline copy).
3. Restore from the most recent verified backup.
4. Document timeline; notify cyber insurance carrier.

PREVENT THIS — TURN ON

- ✓ 3-2-1 with air-gap or immutable storage
- ✓ Quarterly restore tests
- ✓ Documented runbook stored offline
