SECURITY

DNS FILTERING SOS
If something on your network is misbehaving

DO THESE IMMEDIATELY

1. Check filtering dashboard for high-volume blocks by device.
2. Identify the device making suspicious queries.
3. Disconnect that device from the network.
4. Investigate the device for infection or misconfiguration.

PREVENT THIS — TURN ON

- ✓ Filtering DNS at router
- ✓ DoH on every mobile device
- ✓ Weekly dashboard review
