

Stop Account Takeovers On Discord

Plain-English how-to. ~10 minutes. Stops the most common Discord scams cold.

Lock Discord with 2FA, DM controls, app review, and safe-mode habits.

Print, share, and re-run quarterly.

Do This Right Now

#	STEP
1.	Enable authenticator-app 2FA and save backup codes.
2.	Lock DMs to friends only.
3.	Revoke unused authorized apps.
4.	Recovery email has its own 2FA.
5.	Use a unique strong password.
6.	Never run .exe from untrusted sources.
7.	Voice-verify urgent friend asks.
8.	Quarterly audit of connections + permissions.

Why This Matters

- Discord uses long-lived session tokens stored locally on your computer. Info-stealer malware specifically targets these tokens — a su
- Once an attacker has your account they typically: (1) DM every friend with a phishing link or fake 'help me, I'm locked out' plea, (2) dro
- The fix is layered: authenticator-app 2FA blocks password-based attacks; DM controls reduce attack surface; safe download habits st
